

Bathing

THE BOLD LOOK  
OF **KOHLER**®

# KOHLER® Bathing

**JUST WHAT YOU DESIRE.** For over 130 years, we've been perfecting the bathing experience, fine-tuning our offering to deliver exactly what you desire. Our engineers and designers study the movement of water and its effects on the body to develop elegant, stylish products that provide unparalleled immersion experiences with real benefits. As a result, they've created five distinct technologies designed to shape and move water and air, even sound, over and around your body. These technologies deliver completely unique and satisfying bathing experiences – just a handful of the many reasons why Kohler continues to be a global leader in bathing. After you've had a chance to consider the features and benefits of each of our five bathing technologies, choose the one that delivers the experience you seek. This is bathing the way it was meant to be.

**VibrAcoustic™** | The Science of Water and Sound.

**Whirlpools** | Water on Target.

**BubbleMassage™** | Air. Water. Bliss.

**Effervescence** | Water That Sparkles.

**Baths** | Water. Pure and Simple.

## KOHLER® VibrAcoustic

### THE SCIENCE OF WATER AND SOUND.

Kohler has revolutionized the world of bathing. We've created a bath that delivers an unprecedented level of relaxation through sound vibration. It's simple science: water conducts sound. Basic physics. The human body, in fact each cell, consists mostly of water. Basic biology. We combined the ultimate in ergonomic bathing comfort with sound-wave vibration and achieved an experience of relaxation that literally resonates deep within the entire body. Every detail has been meticulously engineered. Each VibrAcoustic™ panel has been precisely positioned within the bath not only to engage specific areas but also to work holistically, maximizing the benefits to the whole body. Collaborating with a renowned sound therapist, we've layered calming instrumental compositions heard above water with sweeping acoustic vibrations experienced below water. Immersed, the body lets go. Breathing actually begins to synchronize with the slow sonic rhythms. The effect is truly irresistible relaxation. Introducing KOHLER VibrAcoustic technology. Welcome to a bathing revolution.

VibrAcoustic technology by Kohler adapts the science of sound therapy, proven to ease stress and enhance well-being, and creates an environment of harmony both invigorating and restful. Music and sound vibration completely surround you, permeating the core of your body. Your breathing and heart rate become entrained, echoing yoga-inspired rhythms that enhance your ability to relax. If you'd rather bathe to your own beat, simply play your MP3 player or PC through the convenient, user-friendly DTV™ – Bath interface. For more information, consult the *Bathing Workbook* or visit KOHLER.com.

- **What will I experience?**

Designed to relax both the mind and body, VibrAcoustic technology balances sound vibration that soothes your body at its very core with preset, original compositions that engage your mind. You feel surprisingly buoyant yet comfortably secure. Using steady beats, the sound vibration and music encourage your breath and heart rate to synchronize with a slower rhythm. Your body and mind are led to an oasis of calm repose.

- **How does it work?**

VibrAcoustic panels broadcast sound waves that travel through the water and gently resound in the body. Strategically positioned throughout the bath to provide the most beneficial effects to the entire body, these panels are concealed within the shell of the bath for a smooth, uninterrupted bathing surface. Music and chromatherapy, a sequence of soothing colored lights, are choreographed to work in unison with the VibrAcoustic panels for a holistic approach to profound relaxation.

- **What else should I know?**

A user-friendly, conveniently located DTV – Bath interface controls all VibrAcoustic features and affords bathers the option of listening to a favorite playlist or radio station.

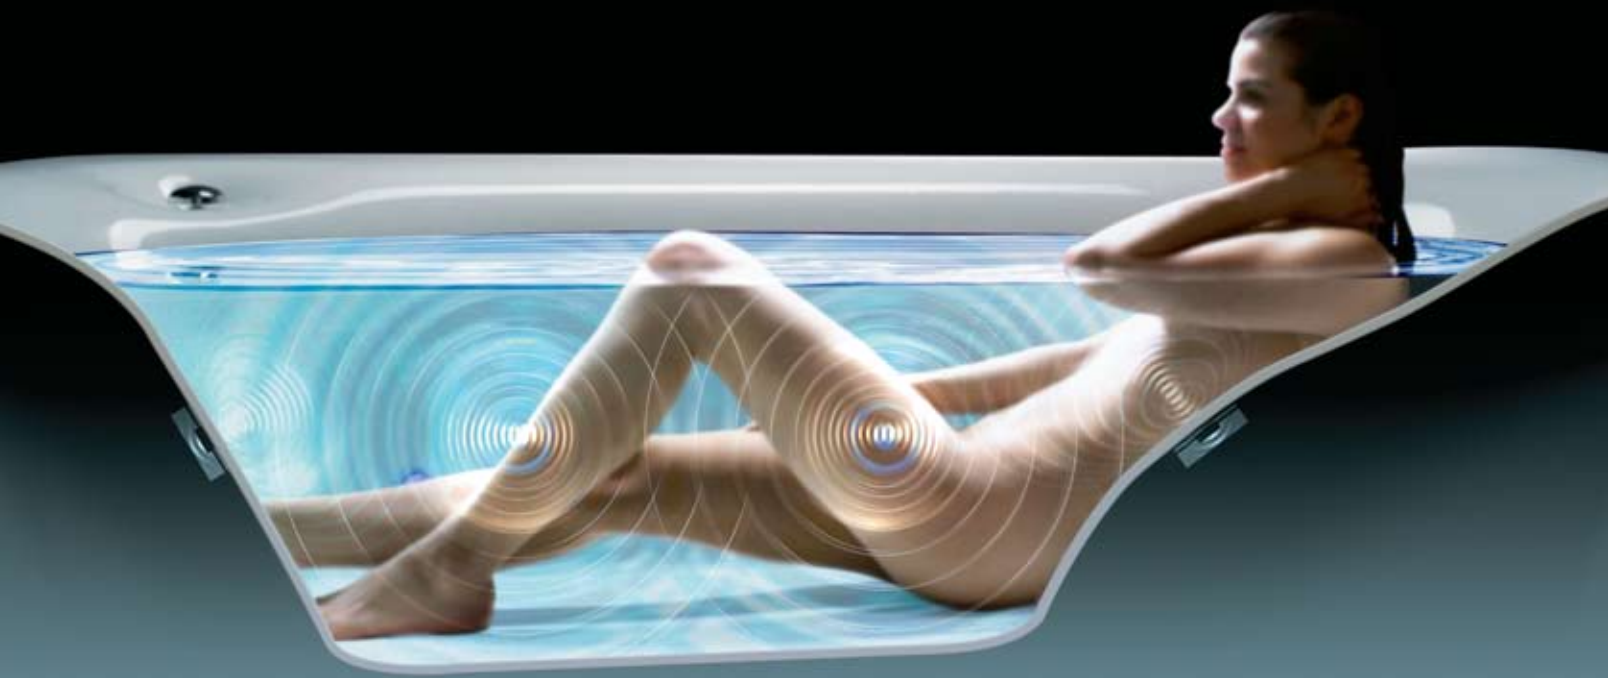

## VibrAcoustic Original Compositions

- **Solitude**

Designed to promote deep relaxation and rhythmic breathing, *Solitude* features universal tones and rhythms evoking the constancy of tides and steadying the breath. Muscles relax and lengthen as a single soft tone resonates, capturing the mind and drawing out the breath. *Solitude* creates a peaceful environment where the mind and body are one.

- **Letting Go**

Offering sweeping, undulating rhythms, *Letting Go* guides you through a symphonic full-body experience. Music subtly rises, then gently dissipates. Intuitively, the body follows *Letting Go* into a relaxed, meditative repose. A wave of energy swells with each breath, releasing tension along the spine through the shoulders, neck and head. *Letting Go* leads you effortlessly into tranquility.

Fountainhead™ VibrAcoustic Bath

### (((• Awakening

Delivering a variety of upbeat soundscapes, with an emphasis on melodic guitar, *Awakening* stimulates the mind and body. This composition begins with a slow, repeating bass note to deepen your relaxation with every breath and encourage your heart rate to decrease. You find yourself calm as the subtle guitar rhythms rise and expand. *Awakening* soothes your body and frees your mind for a serene sense of wakefulness.

### (((• Transcendence

*Transcendence* is designed to integrate mind and body. Pulsating bass is accompanied by delicate single notes that resonate with clarity and slowly fade. Cohesive, yet deliberately random, these notes allow the mind to consciously wander. Unencumbered, you experience the sensation of simply being. *Transcendence* brings you to yourself.

KOHLER® Bathing

## KOHLER® Whirlpools

**WATER ON TARGET.** Kohler has perfected the art of targeted water massage. Our whirlpool designs incorporate the latest discoveries in massage therapy to encourage increased well-being. KOHLER whirlpools are engineered to maximize the unique benefits of hydrotherapy and, similar to a deep massage, can potentially increase blood flow and reduce toxins. Delivering powerful directed massage, our whirlpools offer real solutions for unwinding and revitalization. KOHLER whirlpool jets rotate 360 degrees for precise positioning and adjust for intensity, customizing each bathing experience. With your choice of whirlpool jets, optional backjets and neckjets, or a combination of all three, you can target a range of individual stress points. In-line heaters, available on select models, ensure that the water remains warm. Easy to clean and maintain, our whirlpools provide an ideal water massage every time.

## Whirlpools | Water on Target.

KOHLER whirlpools deliver powerful directed massage, providing real solutions for unwinding and revitalization, and encouraging a sense of increased well-being. To provide you with a clear understanding of KOHLER whirlpool technology and help you determine if this is the technology that best suits your needs and preferences, we've highlighted a few of the exceptional benefits and features it offers below. For details on the full offering of KOHLER whirlpools, please consult the *Bathing Workbook* or visit [KOHLER.com](http://KOHLER.com).

- **What will I experience?**

Enabling the individual to personalize the experience, ProFlex<sup>®</sup> and Flexjet<sup>®</sup> whirlpool jets rotate a full 360 degrees for precise positioning and adjust for intensity. This allows the user to massage individual stress points along the body, helping release tensions, soothe muscle soreness and potentially stimulate circulation.

- **How does it work?**

Optimally positioned ProFlex and Flexjet whirlpool jets provide targeted hydrotherapy with an ideal mix of air and water. Each jet features a nozzle that can be rotated a full 360 degrees for targeted, effective hydro-massage and an outer ring that gives the user complete control over water flow volume. Our variable-speed control, available on select models, allows bathers to choose between intensity settings for a customized bathing experience.

- **What else should I know?**

The following custom options are available on select models. An in-line heater maintains comfortable water temperature and helps ease tense muscles. The Bodyssage backjet system targets pressure points along the spine and across the shoulders, encouraging deep breathing and helping to reduce toxins. Also available, two adjustable neckjets cradle the neck and pulse alternately from left to right, massaging the neck and helping to decrease tension. The optional floating remote control allows bathers to easily and conveniently customize the whirlpool.

Whirlpool Jet

**Whirlpool Jets** KOHLER whirlpool jets are individually adjustable to target specific areas of your body. Delivering the optimal mix of air and water, they adjust 360 degrees for water flow intensity level and 60 degrees for water flow direction.

Backjets

**Backjets** On select models, the Bodyssage backjet system, featuring ten KOHLER backjets, loosens tension throughout the back and shoulders and encourages deep breathing. Our backjets fire two by two starting with the jets located at the lowest position, targeting the lower back, and moving all the way to the jets located at the uppermost position, targeting the shoulders. In this way, our backjets simulate the natural progression of a hands-on massage.

Vigora. Whirlpool Bath

Neckjets

**Neckjets** Available on select models, a factory-installed pillow with two integral neckjets pulses alternately from left to right for a stimulating, stress-relieving massage at the back of the neck. Customize your experience by adjusting the pulse and water flow to your level of comfort.

Chromatherapy

**Chromatherapy** Using the soothing qualities of color to relax both mind and body, chromatherapy features an eight-color sequence that lasts approximately one minute, then repeats, or you can isolate an individual color to suit your mood. Each color is believed to have a unique effect on the bather. Warm colors tend to stimulate and encourage a sense of alertness, whereas cool colors seem to deliver a calming effect. To best enjoy the chromatherapy experience, turn off your bathroom lights, and let the colors wash over your body and mind.

A photograph of a person relaxing in a white KOHLER bathtub. The water is bubbling, and the person's head and shoulders are visible on the left side. The bathtub has a modern design with a central faucet and two side handles. The background is a light, neutral color.

## KOHLER® BubbleMassage

**AIR. WATER. BLISS.** KOHLER BubbleMassage™ technology is designed to deliver a holistic, complete-body experience. Warm air is pushed through 120 airjets positioned along the bottom perimeter of the bath creating thousands of bubbles for a range of tactile and visual sensations. Your entire body is supported and thoroughly massaged by a cushion of bubbles. The random motion of bubbles traveling along your body to the surface helps center and clear your mind. And, with a range of airflow settings, you can tailor the intensity of each bathing experience, from a soothing caress to a vigorous massage. An exceptionally hygienic and easily maintained system, BubbleMassage offers automatic or manual purge cycles for added cleanliness. Enjoy a complete-body sensation or focus on a specific area – your back and neck, your legs and feet or just your feet – with our Zones of Control™ feature. KOHLER BubbleMassage transforms bathing into exhilarating rejuvenation.

## BubbleMassage™ | Air. Water. Bliss.

Offering a comprehensive, whole-body experience, our BubbleMassage technology delivers thousands of bubbles that thoroughly support and massage the body. To help you determine if the invigorating, blissful experience delivered by KOHLER BubbleMassage technology offers the bathing experience you desire, we've highlighted some of its finest features and benefits below. To find the perfect BubbleMassage bath for you, consult the *Bathing Workbook* or visit KOHLER.com.

- **What will I experience?**

Bubbles surround, support and massage the body at your preferred level of intensity, helping to center the mind and stimulate the release of tension in your muscles.

- **How does it work?**

120 airjets fill the bath with thousands of bubbles that provide a balanced, all-encompassing body massage. A variable speed blower provides multiple airflow settings to increase or decrease the intensity of the massage for a complete, comfortable and customizable experience.

- **What else should I know?**

The Zones of Control™ feature allows bathers to choose a complete-body massage or one that focuses on the back, legs or feet. With the surge upgrade, BubbleMassage technology can deliver a constant level of intensity or offer a repeating sequence of increasing and decreasing intensity. Automatic or manual purge cycles ensure an exceptionally hygienic and easy-to-clean system. And, with BubbleMassage baths, you are able to add bath oils and salts, if desired.

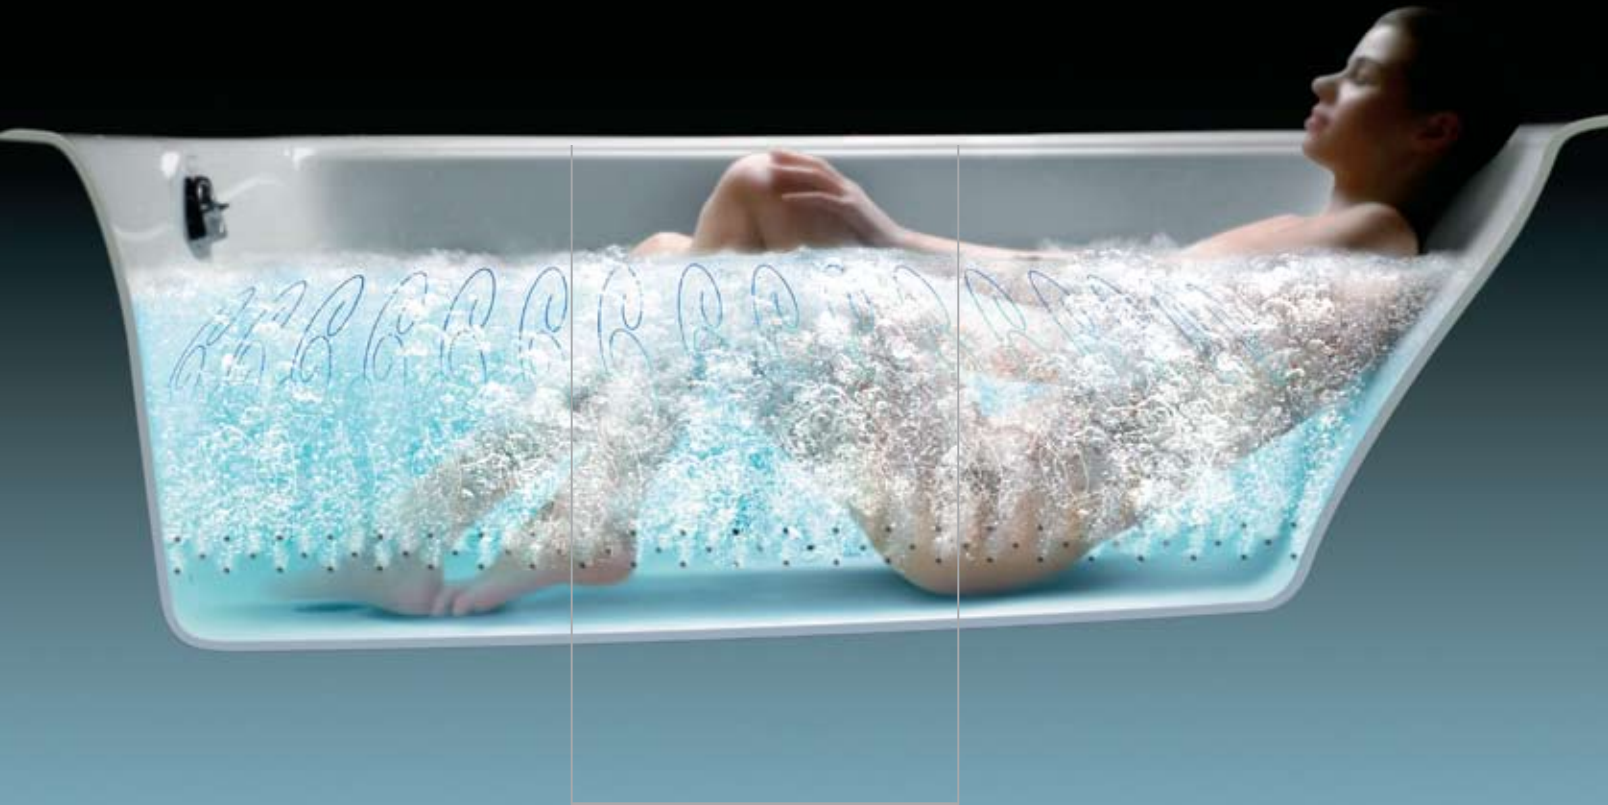

BubbleMassage Airjets

**BubbleMassage Airjet Design** The precise and strategic placement of our BubbleMassage airjets on the lower perimeter of the bath forms a sophisticated, highly efficient delivery pattern. This proprietary design ensures the most comfortable, consistent and complete bubbling action available, making KOHLER BubbleMassage the ultimate airbath experience.

Chromatherapy

**Chromatherapy** Using the soothing qualities of color to relax both mind and body, chromatherapy features an eight-color sequence that lasts approximately one minute, then repeats, or you can isolate an individual color to suit your mood. Each color is believed to have a unique effect on the bather. Warm colors tend to stimulate and encourage a sense of alertness, whereas cool colors seem to deliver a calming effect. To best enjoy the chromatherapy experience, turn off your bathroom lights, and let the colors wash over your body and mind.

Bancroft® BubbleMassage Bath

Concentrated massage for the feet.

Concentrated massage for the legs and feet.

Concentrated massage for the back and neck.

### Zones of Control™ Feature

Available on select models, the Zones of Control feature affords the ultimate in customization, allowing bathers complete control of the massage location. At the touch of a button, three zones at both ends and the midsection of the bath can be independently turned on or off and can be adjusted from low to high intensities. Whether bathers desire a rejuvenating full-body massage or a concentrated massage at the back, midsection or feet, or any combination of these areas, the Zones of Control feature offers a completely customizable experience.

## KOHLER® Effervescence

**WATER THAT SPARKLES.** Effervescence bathing technology caresses your body in a warm, slow-moving embrace. Water and air gently travel through unique ports designed to pamper your body with champagne-like bubbles that cling to your skin. Creating a serene and meditative environment, Effervescence envelops your body with sensory delight. Variable settings, available on select models, allow you to adjust the water flow for bathing experiences that range from a featherlight touch to a tender embrace. Chromatherapy, a sequence of soothing colored lights, is featured on all Effervescence baths. And an in-line heater ensures that the water temperature remains consistent. KOHLER Effervescence bathing technology replenishes your body and spirit.

## Effervescence | Water That Sparkles.

Effervescence technology delivers an utterly divine combination of water and air through a unique system of ports, ultimately enveloping the body with sensory delight. Below we've highlighted some of the outstanding features and benefits of KOHLER Effervescence technology to help you determine if this is the technology best-suited to your needs and preferences. And, if experiencing gentle, slow-moving champagne-like bubbles caressing your skin in a deep, warm soak sounds appealing, look for the Effervescence product offering in the *Bathing Workbook* or visit [KOHLER.com](http://KOHLER.com).

- **What will I experience?**

Small, soothing bubbles travel slowly along the body, surrounding the bather in a warm embrace. A heightened awareness of the senses occurs. Your skin feels replenished. The result is a sensory retreat.

- **How does it work?**

Unlike a standard whirlpool, Effervescence features discreet ports that deliver gentle, caressing bubbles. These ports have been positioned for optimal effect. Variable-speed control offers 18 settings to customize the experience.

- **What else should I know?**

In-line heaters are available to ensure comfortable, consistent water temperature for the full duration of your bath, and variable-speed controls allow users to control the intensity of the bathing experience. Optional chromatherapy, a sequence of soothing colored lights, and floating remote control allow bathers to easily and conveniently customize the whirlpool.

Effervescence technology, offering a delicate caress of champagne-like bubbles, can be experienced on select baths, allowing you to create a tranquil, spa-like environment where you can be soothed and replenished.

sōk® overflowing bath

Effervescence Port

**Effervescence Technology** A series of ports, optimally located, distributes champagne-like bubbles which are comprised of the perfect combination of air and water, allowing them to cling to and caress your skin. The result is a sublime, all-encompassing hydrotherapy experience.

Chromotherapy

**Chromotherapy** Using the soothing qualities of color to relax both mind and body, chromotherapy features an eight-color sequence that lasts approximately one minute, then repeats, or you can isolate an individual color to suit your mood. Each color is believed to have a unique effect on the bather. Warm colors tend to stimulate and encourage a sense of alertness, whereas cool colors seem to deliver a calming effect. To best enjoy the chromotherapy experience, turn off your bathroom lights, and let the colors wash over your body and mind.

## KOHLER® Baths

**WATER. PURE AND SIMPLE.** Sometimes, the simple approach is the best. Uncomplicated and well-conceived. KOHLER baths are like that. Just calm, quiet water and you. We engineer our baths so that nothing comes between you, your bathing preferences and all-encompassing comfort. Our baths are ergonomically crafted to gently support the natural curves and angles of the body. For the bathing purist in each of us, KOHLER baths help keep life simple. Discover the perfect design to complement your ideal bathing experience, and complete your bathroom by comparing the extensive selection of available models in the *Bathing Workbook* or visit [KOHLER.com](http://KOHLER.com).

- **What will I experience?**

Perfect in its simplicity, a KOHLER bath ensures nothing will interfere with you and pure, uncomplicated bathing pleasure. Just you and water – unless of course your bathing ritual includes bath salts, bubble bath or bath oils.

- **How does it work?**

Every KOHLER bath is engineered with an accommodating bathing well, providing optimized ergonomics. Many are equipped with lumbar support for a heightened level of comfort. Our baths offer a flawless combination of the science of function and the art of form to create one extraordinary bathing experience.

- **What else should I know?**

Featuring a tremendous range of sizes, shapes, materials and colors, our baths complement any bathing environment. With multiple installation options, KOHLER baths afford a range of bathroom configurations.
