SHOWER

POWER

OK

Your shower taken to a higher level

DTV™ and DTV II shower systems are redefining the entire concept of a shower. Imagine a showering experience that incorporates water, music, lighting and steam. With DTV II, imagination becomes reality. By pairing the DTV II system with our state-of-the-art media module, a sophisticated electronic bridge is formed, connecting your music, lighting and steam with the DTV II digital interface, allowing you to easily manage and operate the entire experience with the simple touch of a button. No levers, no wall clutter, no manual adjustments, just one well-conceived, simple electronic control – and one unbelievable shower.

DTV™ – It's all about the experience

For those who prefer to concentrate on water, DTV enables you to experience it like no other shower in the world. It's truly the ultimate in personalized hydrotherapy – from the angle of delivery to coverage and temperature. Developed with the assistance of body and wellness experts at Kohler Waters Spa, DTV features the same sleek design and intuitive controls as DTV II, including menu-based navigation and easy-to-use presets.

Digital Soft-Touch Interface

- (a) Display Screen**
Displays current operation and available option menus
- (b) Power**
Powers the system on and off
- (c) User Presets 1-3**
Access to presets for users 1-3
- (d) User Presets 4-6**
Access to presets for users 4-6
- (e) Options/Back**
Recalls menu immediately preceding current display
- (f) OK**
Initiates selected option(s) on active menu
- (g) Magnetic Control**
Controls temperature and menu navigation

For a personalized shower experience ... just press play!

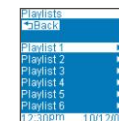

DTV™ and DTV II custom shower systems feature a user-friendly interface, available in both portrait and landscape orientations, that's as easy to navigate as your typical MP3 player. The optional, auxiliary interface (installed outside the shower) enables users to prepare their experience before even entering the shower. The six available presets allow you to customize the showering experience according to a vast combination of variables. DTV enables the user to create and save personalized his and hers showering experiences that offer complete control over temperature and product manipulation. DTV II does all that, plus it incorporates music, lighting, chromatherapy and a soothing blanket of steam.

Removable magnetic control allows users to easily clean the one-piece sealed interface.

Which configuration will you choose?

Kohler has developed six custom shower configurations that work seamlessly with both the DTV™ and DTV II shower systems. Together this comprehensive offering accommodates a wide array of user objectives. Plus, there is a seventh completely customizable option available. Whichever one you choose, all of the shower configurations feature head-to-toe water coverage. The comprehensive offering includes Linear (shown above), Unwind, Envelop, Downpour, Frontage and Surround. For information on all six configurations, please refer to the KOHLER® *Custom Shower Specification Guide*.

The power behind the shower

Now that you are familiar with the digital interface of DTV™ and DTV II, and how simple it is to create a personalized shower that integrates water, music, lighting and even steam, you may be wondering just how it all works. Well, it actually begins behind your wall with our precision-engineered, best-in-class thermostatic valve that powers the entire system.

This six-port valve is capable of operating as many as eight performance showering components. It offers easy, plug-and-go, stud-pocketed installation too — a simple setup for a variety of shower components with the capacity to handle almost any custom configuration. For DTV II, the valve is paired with a media module that acts as a central hub for the additional media communications — lighting, audio and steam. This makes the integration of all these different media seamless for the user, allowing one to create complex programs with ease.

Optimize the DTV™ II experience with soothing chromatherapy

Designed to work seamlessly with the DTV II custom shower system and perfectly coordinate with the aesthetic of WaterTile® bodysprays and showerheads, WaterTile Ambient Rain™ showering panels are one more reason that a DTV II shower system truly is the ultimate showering experience. The WaterTile Ambient Rain showering panel allows you to create your personal ambience of transforming colors and themes from passing clouds and sunsets to flowing water. Relaxing chromatherapy — created and programmed by you.

* Image shown is a screen capture of one of the visual themes offered on the WaterTile Ambient Rain showering panel. Because of the static nature of this representation, the motion of the actual program cannot be expressed.

SoundTile Speakers

SoundTile set of two
4¾" x 4¾" speakers

The sound of design-driven innovation

An integral part of the DTV™ II custom shower system, SoundTile™ speakers personalize your showering experience and create a unified, sophisticated aesthetic. These marine-grade water-resistant speakers are designed to connect seamlessly with the media module, allowing you to link directly to your MP3 or PC and listen to your own playlists of energizing or soothing rhythms. SoundTile speakers feature the same innovative low profile and finish options as WaterTile® showerheads and bodysprays, as well as WaterTile Ambient Rain™, for a completely coordinated showering environment. And they sound ... amazing!
